

1 Tonne Feeder Trailer

Weather-proof bulk feed on wheels — a tonne of pellets, up to 400 birds a week.

Who it's for

A compact bulk feeder that follows the flock. A tonne of pellet feed sits weather-protected off the ground, with dual verandas keeping birds dry while feeding and adjustable gates controlling flow to cut waste — a week's feed for around 400 birds on pasture.

Specifications

Capacity	1 tonne feed · up to 400 birds/week
Chassis	Heavy-duty galvanised steel
Wheels	2x all-terrain (235/75R15LT)
Trough	2.4m length
Feeding	Dual weather-veranda troughs
Gates	Adjustable flow gates
Guards	Feed-trough guards stop fouling
Lid	Wide top-fill, lever handle
Assembly	Turnkey, pre-assembled

Build the system around it

Feed is a third of the mobile setup — housing and water move too. Owners often pair it with:

Matching chicken trailer

Mobile housing that moves to fresh ground with the feed.

Standard IBC Trailer

1,000L of water alongside the feed run.

Nipple drinker station

Clean water on tap wherever the flock grazes.

Add-ons

Feed-trough lid / cover · ramp · custom branding logo
