

Fire-Fighting IBC Trailer

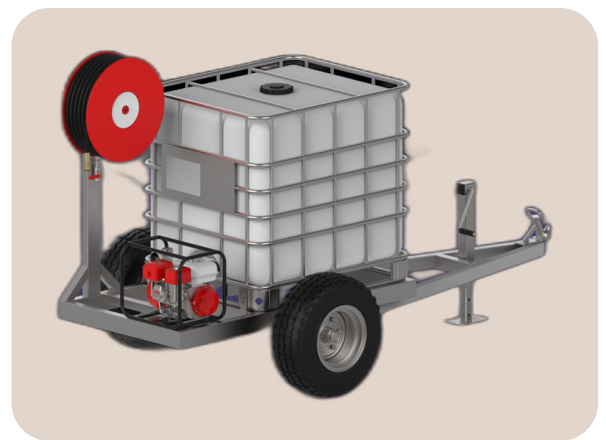

Bushfire response on wheels — 1,000L, petrol pump and 36m of hose, ready when it matters.

Who it's for

Bushfire readiness for a rural property. A 1,000L tank on a heavier chassis, paired with a petrol-powered fire pump, 36m hose reel and adjustable nozzle — and a 20m suction hose to quick-fill or draw from a dam or pool. Ready when it matters.

Specifications

Capacity	1,000L
Chassis	Heavy-duty galvanised steel
Wheels	2x all-terrain (235/75R15LT)
Chassis size	1.8 x 1m
Pump	6.3HP 208cc petrol transfer pump
Hose	36m fire hose + reel, adjustable nozzle
Suction	20m suction hose + hanging hook
Fill	Quick-fill from dam / pool
Assembly	Turnkey, pre-assembled

Build the system around it

Fire readiness is one piece — water carting and stock supply matter too. Owners often pair it with:

Standard IBC Trailer

A second tonne of water for stock and general carting.

Sprayer add-on

Turns the pump to spot-spraying and clean-down duty.

Nipple drinker station

Puts spare water capacity to work for the flock.

Add-ons

Sprayer · custom branding logo
