

Meat Chicken Tractor 5.5 x 2.5m

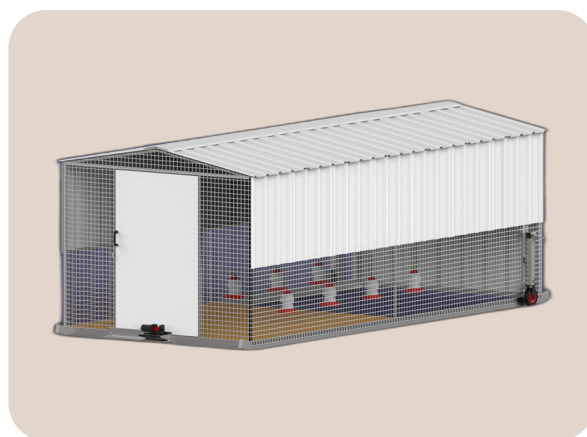

Daily-move housing for up to 60 pasture-raised meat birds — one-person winch moves.

Who it's for

Daily-move housing for pasture-raised meat birds. A front-mounted winch means one person shifts it to fresh ground each day — the birds get clean pasture and grazing, the paddock gets the manure where it's useful. Half raised slats for dry roosting, half open pasture.

Specifications

Capacity	Up to 60 meat birds
Frame	Heavy-duty galvanised steel
Base	Built on skids
Wheels	2x HD height-adjustable castors
Towing	Front-mounted 10m winch (one-person moves)
Flooring	½ raised slats, ½ pasture
Feeders	4x 1.5kg feeders
Drinker	3m nipple drinker line
Access	Large front door (1.8 x 1.1m)
Weather	Weather-resistant roof + panels

Build the system around it

Housing is a third of the setup — water and power follow too. Owners often pair it with:

Standard IBC Trailer

1,000L of water out to the daily-move paddock.

Solar + lights kit

Power for lighting and an automatic drinker refill.

Misting system

Keeps birds cool through an Australian summer.

Add-ons

200L water tank + auto drinker · solar panel · lights · extra slat panels · misting system · extra weather panels

Raising meat birds? Tell us how many.
