

Cattle Mineral Trailer

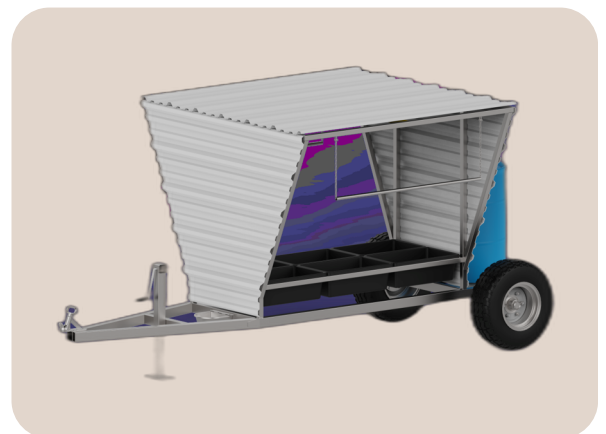

Mobile free-choice minerals for cattle mobs of 100+ — minerals follow the rotation.

Who it's for

A mobile mineral station that moves with the mob. Fixed stations pull cattle back to the same ground and hammer it — this one follows the rotation, so free-choice minerals and parasite management go where the herd grazes and the paddock gets its rest. Raised troughs for cattle-height access.

Specifications

Suits	Cattle mobs of 100+
Chassis	Heavy-duty galvanised steel
Wheels	2x all-terrain (235/75R15LT)
Troughs	6x 32L raised mineral tubs
Water	200L tank + 2.5L auto-fill trough
Parasite	2x Bos Bag hanging bars
Access	Double-sided, padded frame
Weather	Weather-proof trough area
Assembly	Turnkey, pre-assembled

Build the system around it

Minerals move with the mob — water and fencing follow too. Owners often pair it with:

Standard IBC Trailer

1,000L of water out to the same paddock as the minerals.

Electric fence kit

Sets the rotation and holds the mob to fresh ground.

Custom trough config

Trough heights and tub layout set up for your herd.

Add-ons

Feed-trough lid / cover · ramp · custom branding logo
