

Sheep Mineral Trailer

Mobile free-choice minerals for sheep mobs of 100+ — minerals follow the rotation.

Who it's for

A mobile mineral station built for sheep. Lowered troughs and an easy double-sided access design put free-choice minerals at the right height for the mob, and the whole station moves with the rotation — so parasite management and minerals follow the flock and the paddock recovers.

Specifications

Suits	Sheep mobs of 100+
Chassis	Heavy-duty galvanised steel
Wheels	2x all-terrain (235/75R15LT)
Troughs	6x 32L lowered mineral tubs
Water	200L tank + 2.5L auto-fill trough
Parasite	2x Bos Bag hanging bars
Access	Double-sided, lower access, padded frame
Weather	Weather-proof trough area
Assembly	Turnkey, pre-assembled

Build the system around it

Minerals move with the mob — water and fencing follow too. Owners often pair it with:

Standard IBC Trailer

1,000L of water out to the same paddock as the minerals.

Electric fence kit

Sets the rotation and holds the mob to fresh ground.

Custom trough config

Trough heights and tub layout set up for your flock.

Add-ons

Feed-trough lid / cover · ramp · custom branding logo
