

NB1200 Nesting Box

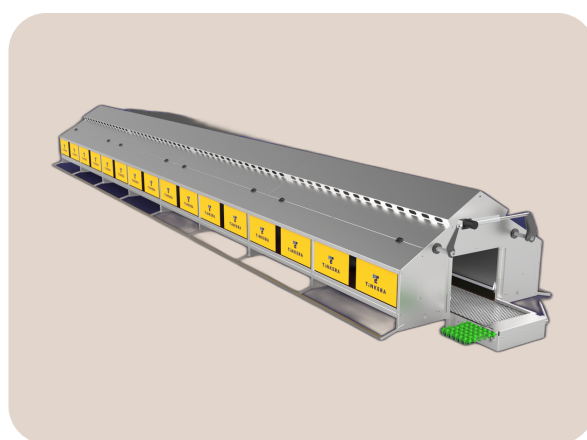

Our largest nesting setup — conveyor collection for large-scale operations up to 1,200 birds.

Who it's for

Our largest nesting setup, for large-scale operations. Four conveyor modules run to a central collection bay — maximum roll-away capacity with the roosting, ventilation and exclusion gating to match a full commercial flock.

Specifications

Capacity	Up to 1,200 birds
Construction	Galvanised steel
Configuration	Double-sided (4x C300 modules)
Nesting	Egg-rollaway + 500mm conveyor belt
Collection	Central conveyor collection bay
Roosting	16x 1.2m roosting bars
Gates	Shared-actuator exclusion gates
Flooring	Astroturf + privacy flaps
Assembly	Flat-packed

Build the system around it

Nesting boxes drop into a fixed shed or a mobile setup. Owners often pair them with:

Matching chicken trailer

Take the same flock mobile — clean ground, rested paddock.

30-egg trays

Stackable trays for quick, clean collection.

Spare astroturf pads

Easy-swap pads keep the nesting surface fresh.

Add-ons

Bottom-mounting frame · angle-adjustment hardware · ChickenMaster Pro · solar panel + battery · external collection-bay lid
