

NB300 Nesting Box

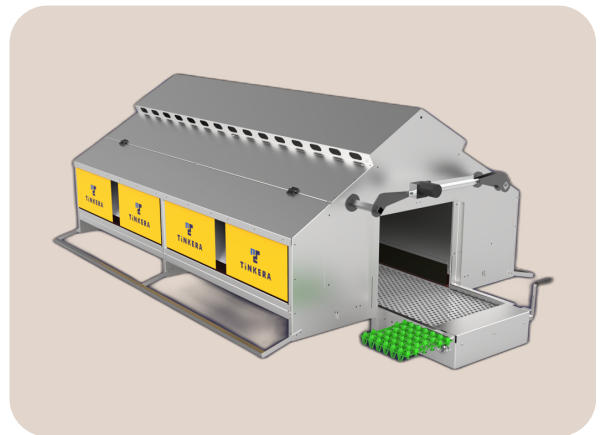

Mid-scale nesting with central conveyor collection for flocks up to 300 birds.

Who it's for

Where nesting gets serious. A double-sided module with a 500mm conveyor belt drives eggs to a central collection bay, with roosting bars and ventilated roofing built in — mid-scale collection without the bending and walking.

Specifications

Capacity	Up to 300 birds
Construction	Galvanised steel
Configuration	Double-sided, single-tier
Nesting	Egg-rollaway + 500mm conveyor belt
Collection	Conveyor-drive collection bay
Roosting	4x 1.2m roosting bars
Gates	Shared-actuator exclusion gates
Flooring	Astroturf + privacy flaps
Assembly	Flat-packed

Build the system around it

Nesting boxes drop into a fixed shed or a mobile setup. Owners often pair them with:

Matching chicken trailer

Take the same flock mobile — clean ground, rested paddock.

30-egg trays

Stackable trays for quick, clean collection.

Spare astroturf pads

Easy-swap pads keep the nesting surface fresh.

Add-ons

Bottom-mounting frame · angle-adjustment hardware · ChickenMaster Pro · solar panel + battery · external collection-bay lid
