

NB600 Nesting Box

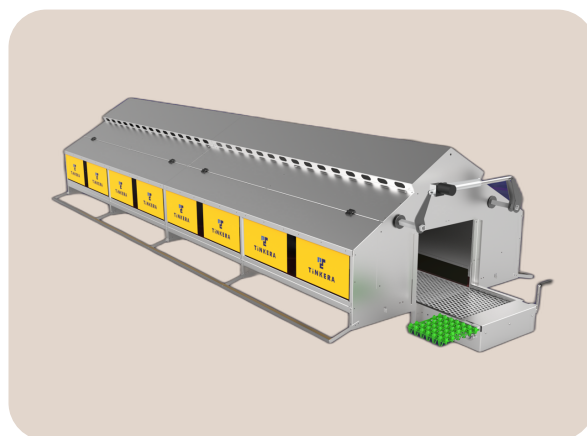

Commercial-grade conveyor nesting for serious egg production up to 600 birds.

Who it's for

Commercial-grade nesting for serious egg production. Two 300-bird conveyor modules run to a central collection bay — the volume step for a growing pastured operation, with roosting and ventilation built in.

Specifications

Capacity	Up to 600 birds
Construction	Galvanised steel
Configuration	Double-sided (2x C300 modules)
Nesting	Egg-rollaway + 500mm conveyor belt
Collection	Central conveyor collection bay
Roosting	8x 1.2m roosting bars
Gates	Shared-actuator exclusion gates
Flooring	Astroturf + privacy flaps
Assembly	Flat-packed

Build the system around it

Nesting boxes drop into a fixed shed or a mobile setup. Owners often pair them with:

Matching chicken trailer

Take the same flock mobile — clean ground, rested paddock.

30-egg trays

Stackable trays for quick, clean collection.

Spare astroturf pads

Easy-swap pads keep the nesting surface fresh.

Add-ons

Bottom-mounting frame · angle-adjustment hardware · ChickenMaster Pro · solar panel + battery · external collection-bay lid
